

RODENT DETERRENT

BANISH is formulated with essential oils that deliver a smell and taste developed to deter mice, rats, and other critters from burrowing into a vehicle's engine compartment and undercarriage. The warmth of a recently used vehicle can last up to 24 hours, making it an inviting place for various rodents to seek warmth and begin nesting. By applying BANISH to these areas, a barrier is created to help keep away rodents and their offspring.

- Developed to prevent rodent entry, nesting, and foraging
- Easy application to keep unwanted critters away
- All natural - a safer alternative around people & pets

BANISH RODENT DETERRENT

APPLICATION INSTRUCTIONS

- 01** *NOTE:* If rodent activity is seen in the engine compartment or undercarriage, first remove any nesting before application.
- 02** *FOR BEST RESULTS* - Clean the area being treated before application, blow-off / remove dirt and grime for maximum adhesion of the product.
- 03** Shake bottle before each use and use in a well ventilated area. We recommend utilizing personal protective equipment (PPE) to minimize the risk of potential hazards.
- 04** Attach a compressed air line to the air fitting on the Universal Misting Gun.
- 05** Insert the suction tube attached to the Misting Gun into a bottle of BANISH and secure it by tightening the cap.
- 06** Use the blue adjustment knob to adjust product flow. Spray an even coat on any wires and crevices found in, around, and under the engine compartment.
- 07** Evenly coat any exposed wires harnesses or entry points found in wheel wells, surrounding undercarriage, and bumpers.
- 08** *WARNING:* Avoid spraying too much product on exhaust components!
- 09** Close hood and check windshield for any overspray. If found, spray with glass cleaner and wipe away with a clean rag.
