

# COOLING-SYSTEM SEALER

AUTOMOTIVE ADDITIVES & LUBRICANTS - #0104

## OUTSTANDING FEATURES

- Helps seal radiator, gaskets and freeze plugs.
- Non-metallic.
- Non-clogging.
- Compatible with all types of coolant.

## DESCRIPTION

MOC® Cooling System Sealer is designed to seal leaks caused by cracks or holes in the radiator, block and head gasket. It has the unique ability to seal leaks by forming a "scab" over the hole or damaged area. This nonmetallic formula is safe to use with all types of antifreeze and coolants. This non-clogging product may be used in all pressurized systems and will not harm plastic, metal or rubber parts.

## APPLICATION

Add directly to radiator after coolant/water mixture has been added. Do not add through flush machines. Run MOC® Cooling System Sealer through entire system. If MOC® Cooling System Sealer does not help stop a leak, this may be a sign of more serious cooling-system problems that should be addressed.

## SPECIFICATIONS

<u>Test</u>	<u>ASTM Method</u>	<u>Typical Results</u>
Appearance	-	Clear & Bright
Color	-	Light Amber
Odor	-	Bland
pH	D1293	8.5-9.5
Density (g/mL)	D4052	1.07
Density, U.S. (lbs/gal), calculated	-	8.96
Boiling Point (°F)	D1120	>212

## PACKAGING

**Fill:** 8 oz.

**Case Quantity:** 24

**Case Weight:** 15 lbs.
