

PRECISE™ CUT

AUTOMOTIVE ADDITIVES & LUBRICANTS - #28042

OUTSTANDING FEATURES

- Removes P1000 grit and finer sanding scratches and surface defects
- Effective on newer, harder to buff clear coats
- Advanced micro abrasive technology for a controlled, consistent cut
- No sticking, no dusting, no film residue
- Extended work cycle reduces rework and pad loading
- **100% body shop safe – no silicones, fillers or waxes**

DESCRIPTION

PRECISE™ CUT is a micro abrasive compound formulated to effectively remove 1000 grit or finer sand scratches and surface defects. Formulated for longer work times and a wide range of user conditions without sticking, dusting, or film residue left behind. **PRECISE™ CUT** is body shop safe and does not contain silicone, wax, or fillers.

APPLICATION

Directions: For use with a DA polisher or rotary buffer. Apply product directly to a cool surface working a small area at a time approximately 2' x 2'. Work product until it is almost dry. Wipe off excess material with a clean microfiber towel. Repeat process until desired results are achieved. Formulated to be used with wool pads or foams pads.

DA Orbitals - use 70300 wool or 70325 foam cutting pads

SPECIFICATIONS

Test	ASTM Method	Typical Results
Appearance	-	Viscous Liquid
Color	-	White
Odor	-	Grape
Density (g/ml)	D1475	~9.3
Viscosity, cPs	-	~31,500

PACKAGING

Fill: 32 oz.

Case Quantity: 6

Case Weight: 16 lbs.
