

PRECISE™ FINISH

AUTOMOTIVE ADDITIVES & LUBRICANTS - #28062

OUTSTANDING FEATURES

- Removes minor swirl marks, holograms and micro marring
- Produces a smooth, high clarity, high gloss finish
- Ideal final step prior to waxes, sealants or coatings
- Balanced micro abrasive blend for professional finishing
- No residue, no dusting, long working time
- **100% body shop safe – no silicones, fillers or waxes**

DESCRIPTION

PRECISE™ FINISH is a unique balance of abrasives and cleaners to remove any minor paint imperfections such as swirl marks, holograms, and minor surface imperfections. **PRECISE™ FINISH** is the last step in the paint correction process before any additional paint protection products are applied. **PRECISE™ FINISH** is body shop safe and does not contain silicone, wax, or fillers.

APPLICATION

Directions: For use by hand or with a DA Polisher. Apply product directly to a cool surface or a foam applicator. Work product until it is dry. Wipe off excess material with a clean microfiber towel. Formulated to be used with foams pads.

DA Orbitals - use 70337 MF finish or 70327 foam finish pads
